

OIL SKIMMERS

FUNCTION

Cleanawater Oil MiSER oil skimmers are designed to remove all types of oil, fats, greases and floating materials from holding ponds, storage areas and water surfaces in tanks, pits and sumps. Engineered to run 24 hours per day with low maintenance and little energy consumption, the Cleanawater Oil MiSER can recover up to 700 litres of oil per hour. Light weight, automated and durable, we can engineer a solution to suit all requirements. All Cleanawater Oil MiSER systems are specifically designed to exceed industry standards and regulations.

IDEAL FOR & COMMONLY USED IN

- Storage tanks, drainage pits and wash bay sumps
- Underground tanks, wells, ponds, lakes or setting pits
- Food processing plants
- Mining applications and workshops
- Heavy equipment workshops
- Steel manufacturing plants
- Parts washing and coolant tanks

PRODUCT RANGE

Cleanawater Oil MiSER oil skimmers are available in all sizes to treat small single treatment areas to large multiple treatment areas, Cleanawater Oil MiSER skimmers can be engineered to suit your businesses requirements.
